ASIST

Applied Suicide Intervention Skills Training

ASIST Training
January 30 and 31, 2012
8:30 am– 4:30 pm

Fargo, ND
(Location to be announced)

Training Overview

Applied Suicide Intervention Skills Training (ASIST) is a two-day workshop designed for all community members. The goal is to enhance a caregiver ' s ability to assist a person at risk of suicide. ASIST enhances skills to intervene until either the immediate risk of suicide is reduced, or additional life-assistance resources can be found.

The training is divided into four learning modules: attitudes, knowledge, intervention and resources. Skills and principles are illustrated with case studies, presented in videos, role-play simulations, discussions, and the Suicide Intervention Handbook.

Developed by LivingWorks Education, inc., the workshop prepares Suicide First Aid Caregivers to integrate intervention principles into everyday practice.

Skills Obtained

By the end of the workshop, participants will be better able to:

- Dispel myths about suicide
- Identify indicators and assess suicidal risk
- Intervene with a person at risk for suicide
- Reduce barriers which hinder the ability to be direct and comfortable with suicidal situations
- Engage in building resource networks for individuals at risk of suicide

ASIST is designed for all community members to learn how to intervene when someone is at risk of suicide. If you are looking for resources to help cope with a suicide loss, please contact 2-1-1 or (7 0 1) 235-SEEK.

Trainers

Trainers are certified by LivingWorks, Inc. as accomplished practitioners in suicide prevention, intervention, and postvention. Trainers will be Stacie Loegering and Cindy Miller from FirstLink.

Registration

See reverse side for the registration form and registration fees.
